

Joe Chapa

Joe Chapa is passionate about showing audiences what philosophy means for our everyday lives. As a combat veteran and Oxford PhD military philosopher, Joe learned to connect philosophy to the real world first while flying remotely piloted aircraft over Afghanistan and Iraq. Eventually, this work led to his first book,

Is Remote Warfare Moral? (Hachette, 2022). Since then, Joe has become a recognized expert in artificial intelligence in particular and the ethics of emerging technology more generally. He served as an AI advisor to the Secretary of the Air Force and was the US Air Force's first Chief AI Ethics Officer. He is a sought after speaker for his ability to engage and challenge audiences to imagine what it means to be human in the age of AI.

Qualifications

- Well-respected leader in AI
- Philosophy PhD (Oxford)
- ~20 Year USAF veteran
- World-class ethicist
- Published Author

HUMAN INTELLIGENCE IS EMBODIED INTELLIGENCE

What do we humans bring to the table in an AI-driven world? What we offer is *embodied* intelligence –a lesson Aristotle tried to teach us 2,400 years ago.

Talks

ETHICAL DECISION-MAKING UNDER PRESSURE

Whether a combat pilot is releasing weapons close to friendly forces or a CEO making hiring and firing decisions, this talk provides leaders with the philosophical tools they need to make the right call in difficult circumstances

PHILOSOPHY OF LANGUAGE AND LANGUAGE MODELS

For the first time in our 200,000 year history as language-speakers, something other than humans can use our languages. What does that mean for us?
